

isys WEIGHSOFT
OFFICE | WEB | MOBILE

Isys Weighsoft offers a comprehensive management solution for businesses in the waste management, recycling, ready mixed concrete and aggregate industries.

Isys Weighsoft is a modern, browser based solution that is simple to use, yet powerful, flexible and tailored to your needs. With options available for customer and supplier portals, mobile applications and automated weighbridge interfaces, Weighsoft can deliver efficiency and powerful analysis.

The new Isys Weighsoft solutions have been designed and delivered based on more than 30 years' experience in the industry.

The Core System:

All Isys Weighsoft installations have the Core System; this is where your customers, suppliers, products, prices, vehicles and other information is managed.

Isys Weighsoft system pricing is very comprehensive and handles all sorts of industry specific requirements such as part loads, waiting time, price groups and tonnage surcharges.

Isys Weighsoft will also invoice your customers, electronically or on paper, and link to your accounting solution. Credit control is very strong and credit card payments can be taken within the system.

There are many system reports as well as a report generator. Reports deliver analysis to help you become more efficient or target growth and Weighsoft will provide you with that information, including scheduled reporting via email.

The Modules:

Industry specific order processing and scheduling processes have been written for the following industries, covering all legal and niche requirements, such as Duty of Care production, stock control and product component analysis.

- Skip Hire
- Landfill
- Domestic Waste Collections
- Quarrying
- Coated / Fabricated Products
- Transfer Station
- Trade Waste Collections
- Tipper / Grab Hire
- Ready Mixed / Volumetric Concrete

Mobile Applications:

Isys Weighsoft has a number of configurable applications that have been written to deal with the specific requirements of each industry sector. Our solutions are installed in more than 1000 vehicles in The UK and include handheld, in-cab and tablet computers. All our applications are upgradable remotely and our new service department holds a stock of spare units in the event of a faulty piece of hardware.

Our experience and proven record of delivering solutions on time and on budget has earned us Platinum Partner status with Casio and won us top awards at the last 2 annual industry dinners.

Web Portals:

Isys Weighsoft delivers information to your customers and suppliers via secure web portals. Customers can view order details, transaction history, including copy tickets, invoices as well as generate reports and download data. Site waste reports can be generated online too.

The new supplier portal allows your suppliers to view, accept or reject work, update details and generate reports.

Isys Weighsoft is backed up with a dedicated team of developers, experienced installers and technical support engineers from our Derby and Horsham offices.

Our team and existing customer base makes us the UK's largest supplier of software into the waste, recycling, ready mixed concrete and aggregates market. What sets us apart is that we listen to customers and then work hard to deliver the solution.
